

Angelo Lucaci

Frontend-focused Software Engineer | Vue.js, JavaScript, Axios, REST APIs | Arad, Romania
lucaciangelo@gmail.com | [+40 736 810 201](tel:+40736810201) | [LinkedIn](#) | [GitHub](#)

Summary

Software Engineer with 4+ years of experience delivering software solutions in enterprise environments and building modern web applications.

Currently developing frontend features for a large-scale enterprise platform using Vue.js, Axios, and REST APIs, with a focus on role-based dashboards, dynamic views, API integration, and user-centric interfaces.

Experienced in frontend-backend collaboration, debugging, testing, validating API responses, and translating business requirements into maintainable software solutions.

Strong engineering foundation gained through complex automotive software projects, with hands-on experience in Agile development, validation workflows, and structured software delivery.

Experience

Aumovio

October 2025 – Present

Frontend Developer

Timisoara, Romania

- Developing frontend features for a large-scale enterprise web application using **Vue.js**, **Pinia**, and **Vue Router**, implementing role-based dashboards, dynamic views, and business-specific workflows.
- Designed and maintained user interfaces tailored to different user roles, ensuring correct access control, data visibility, and consistent application behavior.
- Integrated frontend components with backend services using **Axios** and REST APIs, handling asynchronous data flows and validating API responses.
- Collaborated closely with backend developers to understand endpoint behavior, troubleshoot integration issues, and validate PostgreSQL-backed data flows.
- Participated in technical discussions to align API contracts, frontend requirements, data structures, and expected application behavior.
- Debugged and resolved frontend and integration issues before release, contributing to more reliable deliveries and stable application behavior.
- Translated customer and system requirements into maintainable frontend features, with focus on correctness, usability, and integration readiness.

Continental Automotive Romania

July 2021 – October 2025

Junior Software Engineer

Timisoara, Romania

- Implemented software changes based on project requirements and supported feature development in a team-based engineering environment.
- Performed software testing, bug fixing, and validation activities across multiple modules to support stable integration and delivery.
- Communicated directly with clients and stakeholders, handled feedback, and managed assigned work independently within Agile teams.
- Built strong foundations in debugging, software quality, and working with structured development workflows.

Selected Web Projects

- Designed, built, and deployed **5+ responsive websites** for small businesses, personal brands, and freelance clients.
- Translated client requirements into clean, responsive user interfaces using **React.js**, **JavaScript**, **HTML/CSS**, and **TailwindCSS**.

- Built supporting functionality using **Node.js, Express.js, Strapi, Firebase, and Stripe** for content management, forms, and payments.
- Implemented interactive visual elements with **Three.js** to improve engagement on portfolio and business websites.
- Contributed to feature planning, technical discussions, and implementation decisions in collaboration with frontend and backend teams.
- Collaborated directly with clients to gather requirements, iterate on feedback, and deliver production-ready solutions.
- Optimized websites for responsiveness, performance, and cross-device compatibility.
- **AngeloLucaciXP** – Designed and developed an interactive portfolio website inspired by the Windows XP interface using React.js and modern frontend tooling.
- Implemented custom UI interactions, responsive layouts, and dynamic project presentation focused on user engagement and distinctive design.

Skills

Languages: Romanian (native), English (C2)

Frontend: Vue.js, React.js, JavaScript, HTML5, CSS3, TailwindCSS, Three.js, Axios, Pinia, Vue Router

Backend / APIs: REST APIs, API Integration, FastAPI exposure, Node.js, Express.js

Databases: PostgreSQL, SQL

CMS / Integrations: Strapi, Stripe, Firebase

Tools & Workflow: Git, GitHub, Jira, Confluence, Agile/Scrum, debugging, testing, client communication

Additional Technical Background: MATLAB/Simulink, C#, software validation, test automation, integration testing

Design Tools: Figma, Adobe Photoshop, Illustrator, Lightroom

Education

Polytechnic University of Timisoara – Faculty of Automation and Computers

June 2022

Bachelor of Science in Systems Engineering

Timisoara, Romania

Relevant Training

- **Web Development:** React.js Development, Node.js & Express.js, Modern JavaScript (ES6+), Advanced CSS & Flexbox, The Complete Full-Stack Web Development Bootcamp
- **UI/UX Design:** UI/UX Design with Figma
- **Databases:** The Complete SQL Bootcamp: Go from Zero to Hero
